JIT Connects' Inspection module will change the way you manage pre-shift safety inspections. This tool can help you improve daily safety, compliance, and operational visibility across all locations—JIT Connect's Digital Daily Checklists.

Designed for safety-sensitive operations, JIT Connect's Inspection app enables frontline teams to easily complete required checks with visual proof, while instantly alerting supervisors to issues via text and email—ensuring nothing slips through the cracks.

Each operator is assigned a unique PIN code to complete the pre-shift inspection. They scan the encrypted QR code, which is unique to the piece of equipment, complete their inspection, and start their shift. There is no paperwork to file.

Key Benefits:

Instant Risk Detection - If a problem is flagged—such as damaged equipment, blocked exits, or unsafe dock conditions—the system immediately alerts supervisors with photo documentation, enabling fast and proactive resolution.

Stronger OSHA Compliance - Checklists are timestamped, giving you a real-time audit trail to meet regulatory standards and internal protocols. Instead of using a generic checklist, checklists are designed for the piece of equipment being inspected. This ensures all proper inspections are being completed. Inspections are stored in the cloud and can be easily retrieved for review and distribution in minutes.

Daily Oversight - Each operator will have a unique PIN code to complete the inspection. Supervisors and managers have full visibility into what was done, when, and by whom—ensuring accountability and eliminating the need for manual logging or missed tasks. don't be

Consistency Across All Locations - JIT Connect enables customers to standardize daily processes across multiple sites, resulting in uniform quality, safety, and performance.

BONUS: Easily track your forklift operators' safety training certificates and be notified when they are due for recertification.

Eliminate the hassle of paper inspections getting ignored, lost, or piling up in a file somewhere. For about $10 per unit per month, you can have peace of mind knowing that inspections are being conducted, documented, and deficiencies can no longer slip through the cracks.

OSHA Compliance: Better than paper, less costly than Telematics.
