

Enhanced Toyota forklifts available now

Toyota has added a wide range of improvements and upgrades to their 8 Series 4 wheel forklifts. In addition to their 4,000 lb to 6,500 lb lifting capacity they now include these new standard features:

- **Redesigned powertrain** delivers better performance and longer run times.
- **MyInsights Telematics** comes with every 4 wheel forklift.
- **Synchronized steering** ensures the steering wheel and tires are always in sync.
- **Automatic parking brake** engages once the forklift comes to a complete stop and the operator leaves the seat.
- **4.3" Color multi-function display** that includes load meter and selectable indoor and outdoor back lighting.
- **Premium full suspension seat** with orange seat belt provides the best comfort in the industry.
- **LED front projector type headlights**

Tell our team about your needs, and we'll recommend the best enhanced 8 Series 4 wheel forklift for your operation!

Are You Finalizing Your 2025 Budget?

Schedule preventive maintenance now for a flat rate

When you take advantage of our planned maintenance programs, you can keep your expenses under control for routine service. Our certified technicians schedule preventive work around your schedule to avoid unnecessary downtime.

Did you know that Toyota forklifts have a 500 hour preventive maintenance cycle, compared to 250 hours for many competitors, saving you money over the life of the machine? If you were over your service budget in 2024, then Toyota is your solution to save!

Best Practices Order Picker Tips

When to use one

Order pickers are most valuable for removing individual products from shelving, instead of an entire pallet. The reason is that it's inefficient to pull down an entire pallet only to grab one or two items. If you're continuously needing to take single products off of a rack, an order picker is a better option for you than a traditional forklift.
