

**QUIET
STRENGTH**

Cupid Couldn't Have Made a Better Match for Your Operation

Than Toyota's NEW Integrated Large Electric Pneumatic Forklifts

Packing all the strength and capabilities you'd expect from an internal combustion machine, these new forklifts are powered by custom designed lithium-ion batteries and produce zero direct emissions. They're engineered specifically to operate in lumber yards, construction sites, and heavy duty manufacturing facilities normally reserved for large IC forklifts.

- Load capacity 13,500 lb – 17,500 lb
- Max travel speed 12.4 MPH
- Max lift speed 71 FPM (feet per minute) – 84 FPM

Best Practices

Forklift Hydraulic System Tips

Inspect your fluid levels

A crucial part of forklift hydraulic system maintenance is to regularly check the fluid levels, because if they get too low, it can damage your machine's pumps and lead to cavitation. We suggest that you don't mix different fluid types together, and that you make sure the fluid you top off with meets the specifications provided by the manufacturer.
