

Whether You're Spring Cleaning or Moving a Large Volume of Product...

You need the right equipment for the job

Toyota Core IC Cushion and Core IC Pneumatic forklifts have advanced features that make your operation more effective. Prevent accidents through the Toyota System of Active Stability (SAS), which detects unsafe conditions and activates stabilizing measures. Plus, avoid spilling loads because of their Active Mast Control that automatically limits forward tilt when load weight is unstable.

50-8FGC25U Core IC Cushion

- Load capacity 5,000 lb
- Max travel speed 10.6 MPH
- Cushion tires designed for indoor facilities with smooth concrete floors

50-8FG25U Core IC Pneumatic

- Load capacity 5,000 lb
- Max travel speed 10.9 MPH
- Pneumatic tires designed for indoor-outdoor environments, yards, and construction sites

Best Practices Cold Storage Facility Tips

Use the right tires

Selecting the appropriate tires is important for safe and efficient forklift operation in cold storage facilities. We recommend opting for polyurethane tires with microgrids or razor sipes, as they provide better traction and braking than other types of tires, especially in slick, wet, and icy conditions.
