Scan, Inspect, Report—without All the Paperwork!

Our all new JIT Connect app simplifies daily machine inspections

The JIT Connect inspection tool makes it fast and easy for your team to complete equipment checks. Here's how it saves you time, improves compliance, and ensures accountability:

Inspections are customized for each machine – A unique QR code on each piece of equipment brings up the required checklist for that machine.

Hold each operator accountable – Operators are assigned their own PIN to access the app and complete the inspection, so you have full visibility into what was done, when, and by whom.

Immediate alerts – If equipment problems or unsafe conditions are flagged, supervisors are instantly alerted, so they can fix the issue as quickly as possible.

No more paperwork – The JIT Connect app gets rid of filing cabinets, missing or incomplete forms, and wasted time.

Keep tabs on operator training – You no longer have to manually track certification dates and upcoming training requirements.

Contact JIT Toyota-Lift to set up your system! We will analyze your fleet and upload all the necessary information to tailor the app to your business.

Improve Your Business's Cash Flow

By relying on our rental fleet

When you choose rental forklifts, rental pallet jacks, a rental floor scrubber, or any other rental from JIT Toyota-Lift, you avoid major upfront expenditures. Plus, you will have predictable monthly expenses and can easily get rid of a machine that isn't justifying its cost. This strategy frees up your budget for labor, inventory, or other operational needs.
