

**QUIET
STRENGTH**

Clean Power that Doesn't Sacrifice Performance

Choose Toyota's Integrated Large Electric Pneumatic Forklifts

Packing all the strength and capabilities you'd expect from an internal combustion machine, these forklifts are powered by custom designed lithium-ion batteries and produce zero direct emissions. They're engineered specifically to operate in lumber yards, construction sites, and heavy duty manufacturing facilities normally reserved for large IC forklifts.

Load capacity: 13,500 lb – 17,500 lb

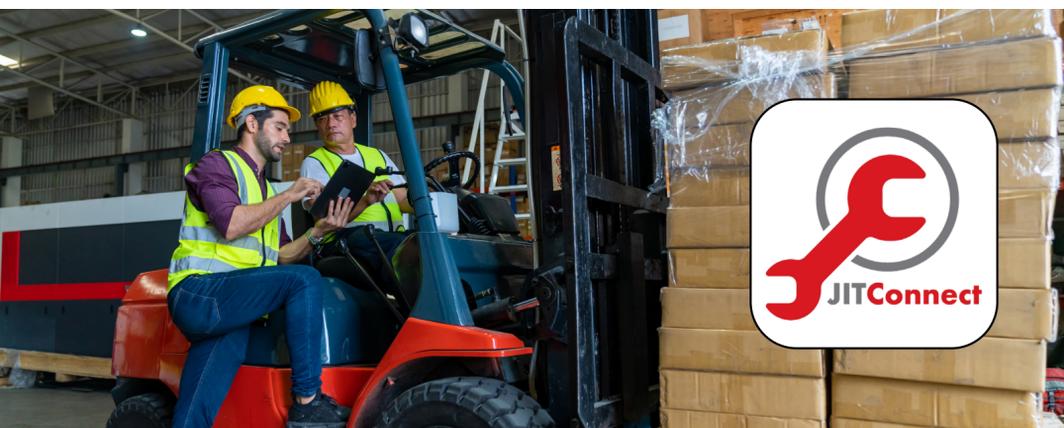

Max travel speed: 12.4 MPH

Max lift speed: 71 FPM (feet per minute) – 84 FPM

Prevent Expensive Forklift Downtime

Using the new JIT Connect app for daily machine inspections

Bridging the gap between paper inspections and costly telematics, JIT Connect provides digital checklists, maintenance alerts, OSHA-ready reporting, and more. It makes it simple to keep your machines operating at their best, hold employees accountable, and ensure compliance.

Genuine Parts, Genuine Performance

Upgrade to the Toyota 4Y Industrial OEM filter

If you are currently using a YZZ AM filter in your Toyota forklift, we recommend switching to the 4Y Industrial instead. This OEM option is manufactured by Toyota, ensuring a better fit and superior performance compared to aftermarket filters.

National Battery Day Is on Wednesday, February 18!

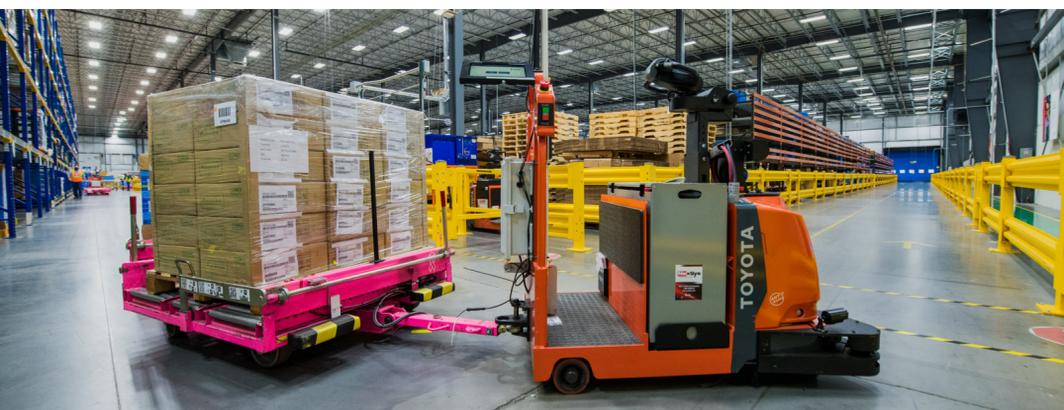

It's your reminder to properly maintain your forklift batteries

As one of the most critical and expensive components of your machines, it's important to give your batteries the care they require. Our battery services, including preventive maintenance, testing, washing, and charger support, are designed to help extend battery life, improve runtime, and avoid unexpected downtime.

February 18 serves as a day to recognize how batteries make our lives easier and more productive. Use National Battery Day to ensure that your forklift batteries are kept in top condition!
