

Service Calls Made Fast and Easy

New Tool!

JIT Connect helps you submit requests in under a minute

Replace time consuming phone calls, emails, and guesswork with the JIT Connect app's brand new service call feature. It's intuitive, quick, and simple to use—all you have to do is scan your machine, snap a photo of the problem, add a brief description, and your technician arrives with all the necessary information and parts, prepared to fix the issue the first time around.

The service call feature streamlines communication, provides real time updates, and results in fewer headaches. Plus, it's FREE for customers who have the JIT Connect app!

Reduce Labor Needs and Make Your Operation More Efficient

We'll get you started with automation today!

Implementing automation for the first time or expanding what you currently have can be a daunting job. If you're unsure which technology is right for your operation and particular requirements, then contact our team. We'll examine your facility, lay out the best options for you, and then assist with any set up, installation, or training that is needed.

Is Your Budget Stretched Thin by Labor Costs?

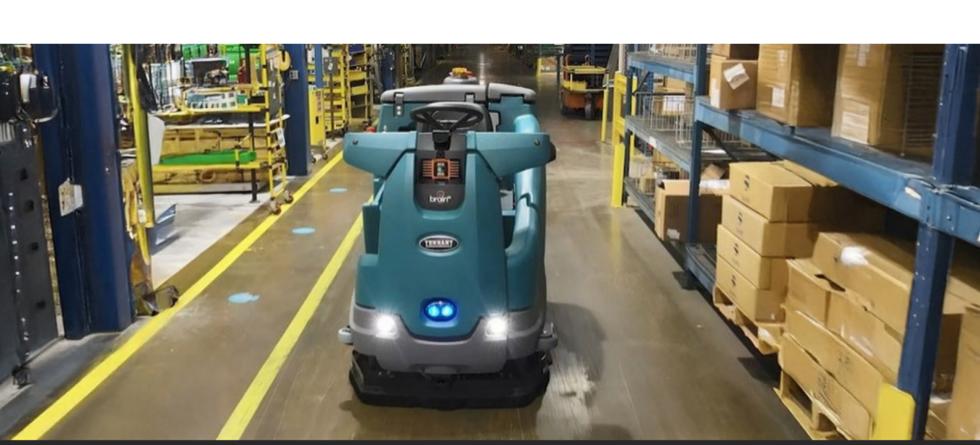

Shift key tasks to Toyota Automated Guided Vehicles (AGVs)

Toyota autonomous vehicles make your operation more cost effective. They take the place of human operated equipment to minimize the expenses of a wide range of time consuming tasks like moving products, stacking pallets, and connecting your various workflows together. Choose from a variety of AGVs, including:

- Carts
- Forklifts
- Tow tractors
- Tugs

Simplify Cleaning Your Facility

With Tennant autonomous floor scrubbers

By reacting to their environment, navigating around obstacles, and running without human operators, Tennant autonomous floor scrubbers free up your employees to focus on higher value tasks. They operate around the clock to keep your facility looking its best, and they lower maintenance costs by eliminating some of your labor requirements.

Best Practices

Warehouse Automation Tips

Implement a management software system

By automating data collection, you will be able to monitor what's going on in your warehouse, identify slow points in your process, and know when to stock up on different products or materials. Warehouse management software will help your shelves stay stocked and can even be integrated with many types of warehouse equipment, so your entire operation works seamlessly.

Talk to our team about adding warehouse management software to your operation today!
