

Stop Losing Hours to Downtime

The Toyota 50-8FGCU25 Core IC Cushion forklift keeps you working all day long

Designed from the ground up to maximize your productivity, the Toyota 50-8FGCU25 increases your uptime and is dependable for high volume operations.

- **Catch problems early** – MyInsights® telematics comes pre-installed to monitor your forklift's health and identify issues before they cause delays.
- **Get back to work fast** – Tool free access to key service areas means your team spends less time on maintenance and more time lifting.
- **Prevent tipping and improve efficiency** – The Toyota System of Active Stability (SAS) detects unsafe conditions and activates stabilizing measures to help avoid accidents.
- **Take on your toughest jobs** – The 50-8FGCU25 has a 5,000 lb capacity, 189" triple mast, 42" forks, and a sideshifter attachment.

Best Practices

Mistakes to Avoid When Buying Used Forklifts

#1: Focusing only on price instead of total cost

One of the most expensive mistakes that forklift buyers can make is shopping purely based on the price tag. A low upfront cost looks great until the downtime, repair, and parts expenses start to add up. A used forklift with hidden issues can easily be more expensive over time than a higher quality unit with a clean service history.
