

National Forklift Safety Day Is on June 9, 2026!

Is Your Warehouse as Safe as You Think?

NATIONAL
**FORKLIFT
SAFETY DAY**

**JUNE
9
2026**

One day to check—365 days of risk if you don't

Your forklift operator training might be OSHA compliant. But what about everything else? Use National Forklift Safety Day as the push to go further. We offer multiple solutions:

Toyota SEnS System — Alerts operators to obstacles up to 32' away with lights and buzzers that intensify as objects get closer. Fewer blind spots, fewer accidents.

JOEY Lifts — Alternatives to ladders that free up both hands, lift up to 2,200 lbs, and keep order pickers moving safely at up to 7 MPH.

Dock levelers & safety equipment — Moon mirrors, blue lights, dock levelers, and more to protect every corner of your facility, not just the forklift lane.

Operator training — We provide everything you need to meet OSHA requirements, from classroom instruction to performance evaluations.

Don't wait for an incident to find the gaps. Schedule a safety walkthrough with our team.
