

More Uptime. Less Guesswork.

Toyota MyInsights® telematics helps you catch problems early

MyInsights® Standard

Included with your forklift at no cost. It offers live GPS, impact detection, error code visibility, maintenance tracking, and alerts.

MyInsights® Plus

Adds the location layer: zoning and zone alerts, historical event mapping, reporting, and vehicle alerts via email or text.

MyInsights® Plus Compliance

Builds on Plus with pre-operational checklists, checklist reporting, machine information, and more shown on a 7" display.

MyInsights® Plus Productivity

The full command center: operator-specific access and speed control via a badge reader, automatic speed reduction and lockouts for impacts or failed checklists, and more.

Not sure which package is right for your business? Our team will walk you through the levels, so you can make the best choice.

Telematics display and operator badge reader are sold separately from the subscription. Some features vary by model.

Simplify Forklift Maintenance

JIT Connect is two great apps in one

Place service calls with speed and accuracy: JIT Connect's Service feature eliminates back-and-forth communications and provides real time status updates.

Perform pre-shift inspections: Inspection records are stored digitally and accessible from any web browser, helping improve OSHA safety compliance.
